

# A New CNN Model for Medical Image Segmentation

XueJian HE<sup>1</sup>, XiaoHua WU and Lu WANG

In this paper, a new CNN model is proposed for medical image segmentation, which is inspired by U-Net (Ronneberger, Fischer, & Brox, n.d.). In addition to multi-modality, 3D context information is also considered in this 2D model. For the detailed description, please refer to the full paper which is still under preparation.
